## The Old Mill

Dent you remember, Lilly dear,
The mill by the old hill side.
Where we used to go in the summer time.
And watch the feaming tide;
And test the leaves of the feagrant beach,
On its breast so smooth and bright,
When they floated away like exeralds,
In a flood of golden light.

And the miller, love, with his alouchy cap,
And eyes of mildest gray,
Plodding about his dusty work,
Binging the live-long day!
And the cost that hung on the rusty nail,
With many a motly patch,
And the rude old door with its broken sill,
And the string and the wooden latch.

And the water wheel with its giant arms,

Dashing the beady spray, And the weeds it pulled from the sand below, And tossed in scorn away. And the sleepers, Lilly, with moss o'er grown, Like sentinels stood in pride, Breaking the waves where the chinks of time Were made in the old mill's side ?

Lilly, the mill is torn away, And the factory dark and high, Looms like a tower, and puffs its amoke, Over the clear blue sky And the river is turned away above, And the bed of the stream is bare, And the beech is withered, bough and trunk

And stands like a spectre there, And the miller, Lilly, is dead and gove, Hosleeps in the vale below ; I saw his stone in the winter time. Under a drift of snow ; And now the willow is green again,

And the wind is soft and still;

## I send you a sprig to remind you, love, Of him and the dear old mill. Literature.

The politicians anxious for the edurn of Lord Palmerston to power saw that the noble Viscount was likely to walk into Downing-street again over the mangled remains of this Indian Measure, and the opposing forces leared the same result, when, lo! Lord John Russell appeared, like one of Homer's clouds from Olympus, and snatched the baffled ministers from destruction. The veteran Statesman made a suggestion, which, although it did not meet the case prevented an immediate collision of the hostile forces, and thus, by prolonging Lord Derby's tenure another for night, made the present Premier, at least for that length of time, "master of the situation." Lord John proposed that the Government, instead of proceeding with their Indian Bill, should more certain resolutions in a Committee of the whole House, relative to the future rule of Hindostan. This offer, it is needless to say, was greedily accepted, just as a man doomed to execution, and who knows that the allotted time of his existence is about to expire, is in a position to accept or to premise, anything. Mr. Magbeth has introduced a Bill in the Assembly, to " Airend the Division Courts Acts of Upper Canada," baving for its object the increase of Bailette freb. If this Court, as Attorney-General Mardonald observed the othor day, la the " poor man's Court," these fees should be reduced as much as possible.

" Het Majesty's Birth Day will roon arrite, and as it is not the intention of our Militaly Authorities to call out the Militia, out Town Fothers, perhaps, will take some stops to make the occasion a public holiday indeed. Wo observe unmerous other towns and rillages, East and West, are making preparations for a grand display; why should we be singular?

Mr. McGee, one of the representatives in Parliament of Montreal, started a paper some time since, calling it the New Era. From paragraph in a late issue of the Monthed IFit ness we observe he has discontinued it, and sold his subscription list to the proprietor of the N. Y. Talbot. This transaction appears to have given considerable dissatisfaction and number of Irish Roman Catholics consider themselves sold by Mr. McGee in the matter.

## Mcchanics Institute.

We omitted to notice, last week, the closing debate' and fectures, for the season, of the above Association in this pace. It is with pleasure we record the fact, that the exercises ferminated with marked success. The debate on Thursday ercoing, the 29th ult was quite. spirited-the gentlemen engaged is it acquitting themselves with great credit. The attendance of speciators was large, giving unque: Institute.

On Friday evening, we learn, the audience was unusually large-the ladies being the most numerous, attracted no doubt by the ment since last concert.

We regret, however, the disappointment the Committee met with by the non-attendance of the gentleigen expected to deliver addresses on the occasion; and had it not been for the ability of the Chairman, and impromite, the inceting would not have passed off so pleasantly. We understand eleven gentlemen were invited to syeak on the occasion,-one came, three apologized, the balance nil. From this circumstance, the new Committee may learn an important lessoft by making arrangements in time to have " two strings to their bow; " and also to be particular in the choice of speakers. We are not aware of the name of a single gentleman invited, consequently our remarks should be taken as general, in their applicatioh. Altogether, the institute is in quite ! prosperous condition, and we liope the new Committee will labor zealously to maintain its present position.

## North Oxford Election.

You may not be aware of it, but the latter motion'is a new and unique rule of order introduced triginally in our first Council, The question impredictely rose, who was to call of the Bill. Now there is a question for your debating club to decide. The Council settled if that " Nick " was the right person to call for drinks, which I did, and from the conversation we had over said figuification, it is understood that I am to gramble away. The gentlemen ar going very facibly that it would do no harm, and it may against the children. There is one important print in it which I have left out, that is-no one trust gramble unless in my employ; any one load doing so will be prosecuted, as provided for in the case of auctioneers. The Bill is expected to be called for in two weeks. when thee will be an exciting debate. In the meantime I am to gramble without license like the rost of the spirituous dealers.

Now, I hereby ware you. Messrs. "Hiawatha," "Phanix," and "Ratepayer," if from and afer this date you are conglit. In the act of grumpling you will be prosecuted. If you want to growt, god your communications to me or growl at me through the paper, but dea't go insimualing on the Council, you ought to know better. Whom the various prisages becomes clogged

and do not not in porfect harmony with the different functions of the body, the blood looses its action, becomes thick, compiled and disensed; thus causing all, pams, sickness and distress of every name; our strength is ex-hausted, our health we are deprived of, and it nature is not assisted in throwing off the stag-nant humors, the blood will become choked and cease to act, and thus our light of life will forever be blown but. How impaining then that we should keep the various passages of the body freegood open. And how pleasant to us that we have it input power to put a ruodicine in your reach, parally, blorse's Indian Rect Pills, manufactured from plants and roots which grow around the mountainous cliffs in Nature's garden, for the health unil recovery of diseased man. One of the total from which these Pills are made is a Sudmifie, which opens the potes of the skin, and as ists Nature in throwing out the fiver parts of the corruption within. The second is no Explorathe, and Upons and un-HE Subscriber having Replied the above Est, clogs the passage to the lungs, and thus, in he tablishment from Mr. Man. Welligs, intends southing manner, performs its duty by throwmg off phlegm, and other humors from the lungs by copions spitting. The third is a Dintetle, which gives ease and double strength to the kidneys; thus encorraged, they ilraw large amounts of imputity topic the blood, which is

then thrown out bountfully by the urinary or water passage, and which could not have been discharged in any other way. The fourth is a Cathartic, and accompanies the other properties of the Pills while engaged in purifying the blood; the coarser particles of inspirity which cannot pass by the outer outlets, are thus taken up and conveyed off in greater quantities by the bowels. From the above, it is shown that Dr. Moled's

Indian Root Pills not only enter the stomach, but becomes united with the Flood, for they find way to every part, and completely tout and the life of the body, which is the blood! becomes perfectly healthy; consequently of, sickness and pain is driven from the system for they cannot remain when the body become: The reason why people are so distressed

when sick, and why so many die, is because they do not get a medicine which will pass to the afflicted parts, and which will open the natural passages for the disease to be cast out; hence, a large quantity of food and other matter is lodged, and the stomach and intestines are literally overflowing with the corlinated mass thus undergoing disagreeable fermentation, constantly mixing with the blocd, which throws the corrupted matter through every vein and arrery until life is taken from the body by disease. Dr. blorge's PHAS have subjects themselves victory upon victory, by restoring milness. Yes, thousands who have been racked or tormented with sickness, pain and auguish. and whose feele frames have been scorched by the burning elements of raging fever, and who have been brought, as it were, within a step of the silent grave, now stand ready to testify that they would have been numbered with the dead, shoot it not been for this great and wonderful medicine, Morse's Indian Root Pills. After one or two doses had been taken, 16.21 they were astonished; and absolutely surprised, in witnessing their charming effects. Not only do they give immediate case and strength, and take away all sickness, pain and obguish, but they at ence go to work at the foundation of the disease, which is the blood. Therefole, it will be shown, especially by those who use these Pills, that they will so cleanse and parify, that disease—that deadly enemy - will take its flight, and the flish of youth and beauty will again return, and the prospect of a long and happy life will cherish and brighten your days, A. OPERATE by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action. They remove the obstructions of the stomach, bowels, liver, and other organs of the body, and, by restoring their irregular action to health, correct, wherever they exist, such derangements as are the first causes of discase. An extensive trial of their virtues, by Professors, Physicians, and Patients, has shown cures of dangerous diseases almost beyond belief, were they not substantiated by persons of such exalted position and character as to forbid the suspicion of untruth. out confinement or hindrance from business; Their certificates are published in my American Almanas, also, nodes, and pains in the bones and limbs, which the Agents below named are pleased to furnish effectually eradicated.
